

HERBICIDE APPLICATION

TUESDAY MAY 28 AND/OR WEDNESDAY MAY 29, 2019

Ark Ecological Services will conduct an herbicide application at Roxborough Village on Tuesday, May 28 and/or Wed. May 29, weather permitting.

We will be applying Transline (Signal Word: Caution) and Telar (Signal Word: Caution), and possibly 2,4-D LV 6D (Signal Word: Caution), may be used on young weeds that are currently up. Vista (Signal Word: Warning) may also be used on Kochia. We will also work around the 7 Acre Reservoir with Garlon 3A (Signal Word: Danger) and 2,4-D Amine (Signal Word: Danger) that are both aquatic approved herbicides. Milestone (Signal Word: Caution) may also be used around the reservoir.

Herbicides will be marked with a blue dye or yellow dye. Yellow "Pesticide Warning" flags will be posted at major entrances into the open space, along trails, and at key locations to let adjacent property owners and others know about the herbicide applications. Flags have the date sprayed, the herbicides sprayed, and the signal word posted on the back of the flag. Please stay out of sprayed areas until dry - usually about 15 -30 minutes.
